		<p>This game plays similarly to the other Free Fall titles. There are 100 levels to play in v1.0. They can be accessed from the Map screen. In each level, there is 1 or more objective(s). Completing the objective(s) unlocks the next level node and advances your progress through the story of Cinderella. Getting more points in each level earns you more Courage Pins (the equivalent of stars in FFF or MFF). Collect enough Courage Pins to get free power-ups. Unlike the other Free Fall titles, you can make connections of any number of gems in any direction on the board in this app. There are different power-ups that aid you in completing the objective(s). Matching 6+ gems created a Wish magic on the board (equivalent to or FFF's Windchill tile). Matching 10+ gems creates an upgraded Wish Magic in the shape of a cross. Match 15+ gems to create a Magic Butterfly on the board (equivalent to FFF's Glacier). Note that if your connection loops back onto itself, you'll remove all the gems caught in the loop as well.</p>
